

*Dr. Emiliana Borrelli with Professor Sergio Pecorelli of the University of Brescia, Italy*

Dr. Emiliana Borrelli, Chancellor's Professor in the Department of Microbiology and Molecular Genetics and Member of the CEM, received the prestigious Golgi Medal Award in Neuroscience on November 16 in Brescia, Italy.

The motivation for the award reads: "Dr. Borrelli has contributed to the understanding of how dopamine works through ingenious novel approaches that use genetically modified mice". Previous recipients of the award include Nobel Laureate Paul Greengard and neuroscientists Pierre J. Magistretti and Anders Bjorklund.
